

Summary

Cloud and DevOps-focused student with hands-on experience in AWS infrastructure, CI/CD pipelines, Docker, and Kubernetes. Strong in troubleshooting cloud systems, resolving networking and deployment issues, and building scalable, highly available applications.

Education

B.Tech CSE (Cloud Computing and Automation) <i>VIT Bhopal University</i>	2022 – 2026 <i>CGPA: 8.46 / 10</i>
Senior Secondary (Class XII - CBSE) <i>Sri Krish International School, Chennai</i>	2021 – 2022
Secondary (Class X - CBSE) <i>CS DAV School, Chennai</i>	2019 – 2020

Experience

Tata STRIVE – AWS Program <i>Cloud Computing Trainee</i>	2026
– Worked with AWS services including EC2, S3, VPC, RDS, IAM, Route 53, CloudWatch, and CloudTrail. – Deployed EC2 instances, configured security groups, and resolved SSH and connectivity issues. – Troubleshot VPC networking problems including routing, subnet configuration, and internet access failures. – Debugged S3 access issues (bucket policies, ACLs) and monitored systems using CloudWatch logs. – Performed end-to-end cloud troubleshooting and incident resolution across multiple AWS services.	

Technical Skills

- **Languages:** Python, Java
- **Cloud:** AWS (EC2, S3, VPC, RDS, ECR, EKS, IAM, Route 53, CloudWatch, CloudTrail)
- **DevOps:** GitHub Actions, GitLab CI/CD
- **Containers:** Docker, Kubernetes
- **Monitoring:** Prometheus, Grafana, CloudWatch
- **Tools:** Linux, SSH, Trivy, kubectl
- **Core:** Troubleshooting, Networking, Incident Resolution, System Debugging
- **Data Analysis:** Pandas, NumPy, Matplotlib, Seaborn
- **Databases:** MySQL
- **Soft Skills:** Problem Solving, Adaptability, Quick Learning, Technical Communication

Projects

Enterprise-Grade DevSecOps CI/CD Pipeline on AWS EKS <i>DevOps Project</i>	 GitLab <i>GitLab CI/CD, Docker, AWS, EKS</i>
– Designed CI/CD pipeline triggered on code push with automated build and deployment. – Containerized Flask application and deployed to AWS EKS. – Integrated Trivy for vulnerability scanning before deployment.	
Kubernetes-Orchestrated Self-Healing Microservices System (Capstone) <i>Cloud + DevOps</i>	<i>Kubernetes, GitHub Actions, Prometheus</i>
– Built CI/CD pipeline with Docker-based deployments using GitHub Actions. – Implemented Kubernetes liveness probes for self-healing infrastructure. – Enabled zero-downtime deployments using rolling updates. – Integrated Prometheus and Grafana for monitoring and scaling.	
Intelligent Visual Assistance System using Computer Vision <i>AI Application</i>	 GitHub <i>YOLO, OpenCV</i>
– Developed assistive system using object detection and OCR. – Enabled real-time interaction to improve accessibility.	

Certifications

- AWS Certified Cloud Practitioner — Amazon Web Services (2026) [\[Verify\]](#)
- Oracle Data Science Professional Certificate (2025) [\[Verify\]](#)
- IBM DevOps Certification (2025) [\[Verify\]](#)
- Google Cloud Generative AI (2024) [\[Verify\]](#)
- Applied Machine Learning — University of Michigan (2024) [\[Verify\]](#)

Languages

- English, Hindi, Telugu, Tamil
