

## Summary

Cloud and DevOps-focused student with hands-on experience in AWS infrastructure, CI/CD pipelines, Docker, and Kubernetes. Strong in troubleshooting cloud systems, resolving networking and deployment issues, and building scalable, highly available applications.

## Education

|                                                                                              |                                       |
|----------------------------------------------------------------------------------------------|---------------------------------------|
| <b>B.Tech CSE (Cloud Computing and Automation)</b><br><i>VIT Bhopal University</i>           | 2022 – 2026<br><i>CGPA: 8.46 / 10</i> |
| <b>Senior Secondary (Class XII - CBSE)</b><br><i>Sri Krish International School, Chennai</i> | 2021 – 2022                           |
| <b>Secondary (Class X - CBSE)</b><br><i>CS DAV School, Chennai</i>                           | 2019 – 2020                           |

## Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Tata STRIVE – AWS Program</b><br><i>Cloud Computing Trainee</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 2026 |
| <ul style="list-style-type: none"><li>– Worked with AWS services including EC2, S3, VPC, RDS, IAM, Route 53, CloudWatch, and CloudTrail.</li><li>– Deployed EC2 instances, configured security groups, and resolved SSH and connectivity issues.</li><li>– Troubleshoot VPC networking problems including routing, subnet configuration, and internet access failures.</li><li>– Debugged S3 access issues (bucket policies, ACLs) and monitored systems using CloudWatch logs.</li><li>– Performed end-to-end cloud troubleshooting and incident resolution across multiple AWS services.</li></ul> |      |

## Technical Skills

- **Languages:** Python, Java
- **Cloud:** AWS (EC2, S3, VPC, RDS, ECR, EKS, IAM, Route 53, CloudWatch, CloudTrail)
- **DevOps:** GitHub Actions, GitLab CI/CD
- **Containers:** Docker, Kubernetes
- **Monitoring:** Prometheus, Grafana, CloudWatch
- **Tools:** Linux, SSH, Trivy, kubectl
- **Core:** Troubleshooting, Networking, Incident Resolution, System Debugging
- **Data Analysis:** Pandas, NumPy, Matplotlib, Seaborn
- **Databases:** MySQL
- **Soft Skills:** Problem Solving, Adaptability, Quick Learning, Technical Communication

## Projects

|                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                       |
